

Useful Accessories for Magnicon SQUID Electronics

- Breakout Box for maximum flexibility and robustness

- Breakout Cable for easy access to all SQUID electronics in- and outputs

- Multi Connection Cable combines multiple SQUID electronics to a single system

Technical Data

BOB-1	<ul style="list-style-type: none"> ■ Breakout Box for access to all control and output signals ■ all input and output signals are available via BNC connectors ■ usable for one to three channels ■ overload LED indicates if the user defined threshold is exceeded ■ choose between different ground connections for all output channels ■ convenient design of your own high-pass and low-pass filters inside the box ■ connection to SQUID electronics Connector Box via 50 cm shielded cable
BOC-1	<ul style="list-style-type: none"> ■ Breakout Cable as easy alternative to BOB-1 ■ eight output/input BNC plugs ■ usable for one to three channels ■ high quality cable with 1.5 m length ■ delivered with every SQUID electronics as default
MCC	<ul style="list-style-type: none"> ■ Multi Connection Cable to combine multiple SQUID electronics to a single system ■ with one PC up to 254 SQUID electronics channels can be controlled ■ no additional hardware changes necessary ■ keep all the flexibility to use each system stand-alone or combine all your SQUID electronics to a system as large as you need.
